

## N, N-2 and N-3 Tubing Size Bridge Plugs

Product Family Nos. H40103, and H40115

### APPLICATION

The N™, N-2™ and N-3™ bridge plugs are bridge plugs ideal for tubingless completion applications. The plugs incorporate the same solid slips and swab proof packing element system with positive anti-extrusion backup rings as used on the conventional bridge plugs. The N-3 contains a body lock ring to prevent movement of the body during pressure reversals. The tubing size bridge plugs are available in different durometer packing elements depending on the application.

Features/Benefits	
■	Can be set on wireline or coiled tubing setting tools
■	Solid ring slips
■	Swab-proof element
■	Body lock ring design
■	10,000 psi (689 bar) pressure rating (excluding Size 023)
